C. GRAND PRIX FINAL

From 2 to 3 December, 30 tests were conducted with 06 research of EPO.

- ❖ 15 tests on 2 December 2017
- ❖ 15 tests on 3 December 2017

Through the established convention between the FITKD and DHL express parcel carrier: the 15 samples taken on 2 December were transported to the laboratory in Lausanne (Switzerland) on December 3.

The 15 samples taken December 3 were transported on 4 December 2017 at the laboratory in Lausanne (Switzerland) 1066 Epalinges Lausanne in Switzerland.

All samples were forwarded to the laboratory in Lausanne (Switzerland) to the 1066 Epalinges Lausanne in Switzerland with receipts:

December 04, an email from the laboratory showed that the 2 samples had been well received.

Then by another email from the laboratory on December 6, we informed that samples removed on December 4 by DHL had arrived at the lab on the morning of 06 December 2017.

D. TEAM WORLD CHAMPIONSHIP FROM DECEMBER 05 TO DECEMBER 06 2017

08 men's teams and 05 teams female ,

- ❖ 15 tests on December 05 .
- ❖ 15 tests on December 06

The samples which have been taken on December 5 and 6 , have been sent to the laboratory in Lausanne (Switzerland) to the 1066 Epalinges Lausanne in Switzerland with receipts..

On December 5, samples were abducted by DHL on December 6 and those collected on December 6 were abducted by DHL on December 7 . The laboratory confirmed by e-mail have received all of the 30 samples on December 05 and 06 .

E. WORKING CONDITIONS

They were excellent and best.

The doping control room met the required standard:

A waiting room with air conditioning, with refrigerator filled with sealed drinks and sufficient chairs.

A control room with 2 workstations and enough control equipment.

Toilets (WC with mirrors) equipped with necessary amenities.

The path between the competition Hall and the control room is well insulated and waterproof to the unauthorized, and taking into account confidentiality and discretion of the athletes.

No incidents occurred during the mission from December 2 to December 7.

F. ANTI-DOPING EDUCATION ACTIVITY

This awareness was made the responsibility of Dr. Patrice YAMKER. The site chosen for the awareness has been the athletes warm-up room.

Our satisfactions

- ❖ good knowledge of doping
- ❖ joy and interest of participants
- ❖ the involvement of some framers
- ❖ support of some framers (help us to better raise our sportsmen)
- ❖ the visite to our stand of the Olympic champion ALFAGA 7)
- ❖ the visit of the various anti-doping officials

We received more than 60 athletes, coaches and visitors.

Winning the quiz tests, visitors received pens, tee shirt, a pin's of world Taekwondo.

We sometimes did the proximity awareness , in the Head Quarter of the teams.

Our expectations.

A technical support of the anti-doping division of World Taekwondo to enhance local anti-doping teams.

A program of promotion of the anti doping in different federations affiliated to the world taekwondo would be a plus to the preparation of athletes.

This is my contribution to the success of this triple event, world team championship, the Grand Prix final and gala of the Awards of the world taekwondo 2017.

Dr KOFFI K Jean Serge

Vice-Président of Fédération Ivoirienne de Taekwondo

In charge, for this games , to médical team and anti doping control team.
